The journal publishes innovative, original research involving the controlled release and delivery of drugs and other biologically active agents. The terms "controlled release" and "delivery" are used in their broadest sense to include mechanisms such as diffusion, chemical and enzymatic reactions, dissolution, osmosis, targeting, as ... click here for full Aims & Scope

Editor-in-Chief: Contact the Editor

1. Nanotechnology and the transdermal route
2. Biodegradable polymeric nanoparticles as drug delivery devices
   Journal of Controlled Release, Volume 70, Issue 1-2, January 2001, Pages 1-20
3. Recent advances on chitosan-based micro- and nanoparticles in drug delivery
   Journal of Controlled Release, Volume 100, Issue 1, November 2004, Pages 5-28
4. The role of HER2 in cancer therapy and targeted drug delivery
   Journal of Controlled Release
5. Target specific and long-acting delivery of protein, peptide, and nucleotide therapeutics using hyaluronic acid derivatives
   Journal of Controlled Release, Volume 141, Issue 1, January 2010, Pages 2-12
6. Tumor regression after systemic administration of a novel tumor-targeted gene delivery system carrying a therapeutic plasmid DNA
   Journal of Controlled Release, Volume 143, Issue 2, April 2010, Pages 215-221
7. Controlled drug release from biodegradable thermoresponsive physical hydrogel nanoparticles
8. Design and production of nanoparticles formulated from nano-emulsion templates-A review
   Journal of Controlled Release, Volume 143, Issue 2, April 2010, Pages 175-182
9. Polyester-based micelles and nanoparticles for the parenteral delivery of taxanes
   Journal of Controlled Release, Volume 143, Issue 1, April 2010, Pages 2-12
10. Albumin as a drug carrier: Design of produgs, drug conjugates and nanoparticles
